

Safety Guidelines

Summer Camps

32 YEARS
EXPERIENCE
ORGANIZING
INTERNATIONAL
CAMPS IN SPAIN

provided by
Enforex Camps

With the objective of taking maximum care of the language immersion experience of our campers and to provide them with a safe environment on our camps, we have implemented strict specific safety and hygiene protocols, in addition to adapting our facilities and equipping them with all the necessary means, based on current regulations and the new reality standards. Campers will learn and enjoy their stay with us in a 100% unique and safe experience.

Described below you will find the most important safety guidelines for our Camps. The complete protocols can also be downloaded at the end of this text, as well as a quick guide in which we share with you everything our students will be able to do during their stay.

01

All camps have been completely disinfected before opening.

02

All bus transfers will be reduced to 50% of the capacity of the buses, also the number of transfers will be minimized.

03

Our entire team including teachers, instructors and camp directors have had extensive briefing in the different measures taken and guidelines implemented. They will be happy to explain them to you at any time.

04

At the camp entrance there will be a wet doormat with disinfectant and a dry one that will have to be used by anyone entering or leaving the camp.

05

On the first day campers will receive a small training to make their experience 100% safe, and they will find out about all the activities they will be able to do. All campers must comply with health and safety regulations during the program. Compliance will be checked on a regular basis and disciplinary measures will be taken in case necessary.

06

Throughout the entire camp there will be explanatory signs in different languages to maintain the security and inform campers about the protocols.

07

Temperatures of campers will be measured 3 times a day.

08

During all activities both indoor and outdoor, established groups will have a maximum of 10 participants, always maintaining the personal physical distance required.

09

Activity program will be reviewed and adapted in order to avoid those activities that require more physical contact. (For ex. visits to beach, pool).

10

We will follow current regulations for use of face masks, of which the use for the time being is mandatory in enclosed spaces. All campers must bring 2 face masks per day and disinfectant gel.

11

Common areas will be adapted according to current regulations:

- The dining room will offer sufficient personal space between students.
- Swimming pool will have a maximum capacity, based on rules established by (local) government.
- All classrooms are prepared so that students can maintain a safe distance at all times.

12

The rooms will be double and / or triple in most of our facilities. In any case, the rooms will always comply Health and Safety regulations. On those camps where, until now rooms were shared among more students, the capacity of the rooms will be reduced with 50% in order to guarantee the necessary personal space.

13

We will intensify the ventilation in all our facilities.

14

The entire camp, and more specifically the classrooms, will be deep cleaned with disinfectant products on a regular basis.

15

In the unfortunate event of a camper becoming sick we will activate an emergency protocol. All facilities will have a designated quarantine area in case necessary.

16

It is recommended that students take a Covid-19 test before traveling to the camp.

17

Health and hygiene products will be available at different points of the Camp: hydro-alcoholic solutions etc.

18

All protocols set by the different governmental entities (city council, autonomous community, or Spanish government) will be fully respected thus complying with all specific regulations they require.

19

Due to safety reasons, the laundry service is suppressed for: students will need clothes for everyday. In the event that a camper requests laundry, it will be charged as an extra.

20

In case of suspicion of an infection

In case a member of the staff detects or is informed of any Camper showing SARS-COVID19 symptoms, he will immediately report it to the medical service which in turn will initiate the prevention protocol:

- The staff and medical service will accompany the Camper to the COVID room, where he/she will remain under observation.
- The COVID room is provided with FFP2 masks and alcohol-based hand sanitizer to ensure an adequate sanitation.
- The medical staff will evaluate the Camper, and will elaborate a report which will be sent to the camper's family immediately. This report will be updated in the following hours as well as the communication to the camper's family.
- If the student has mild symptoms or a single symptom such as headache, nausea, vomiting or general discomfort, he/she will remain under observation by our medical team in the COVID room. The medical staff will check and treat symptoms and make a follow-up of their evolution with the appropriate security measures.
- If symptoms persist for the next 12 hours, we will contact the health center to follow instructions.
- If symptoms get worse, the medical staff will contact the emergency telephone number 112 immediately.
- In any of these two cases in which the symptoms do not improve or get worse, we will notify the family following the instructions of the health center to communicate the advice of transferring the student home to spend the quarantine period.

Confirmed case protocol

- In the event a positive case is confirmed on students or monitor, our medical service will contact the Local/regional Health Office to follow Official indications.
- Camp chief will draw up a list of students and personnel who had contact with the affected person, taking special care with roommates and direct responsible monitor.
- All infected person close contacts will be considered suspicious and, as such, will follow the specific protocol for infection suspicious.
- In the cases of confirmed cases within the Campus, we will notify the families, always subject to Health Authorities instructions, the convenience of picking up the student to overcome quarantine at home.
- Enforex Camps reserves the right to carry out a COVID rapid test on the students at any time when necessary to ensure the students' and center's safety.
- In the event that a student's parents refuse their child to undergo the aforementioned test, the student will need to abandon the program immediately.

Taking a break from COVID-19

Enforex Camps has prepared an amazing summer experience with alternative plans so you can learn and have fun, while being safe in this challenging summer!

Gain confidence and fluency in English by actively learning and practicing the language all day long.

Meet new friends and share with them fun times, games and activities.

Enjoy unique environments and maximum comfort.

Develop new skills and build self-confidence through new experiences that will teach you a lot of new things!

You will be away from home, but feeling safe and cared all the time.

Get to know amazing villages and local traditions.

Fall in love with natural surroundings and leave behind technology for a moment.

Be part of fun workshops and activities while singing, dancing, dressing up and signing shirts with friends!

Go for a swim, take a refreshing dip or practice water sports in the pool or the beach!

You will go back home with unforgettable memories and friends.

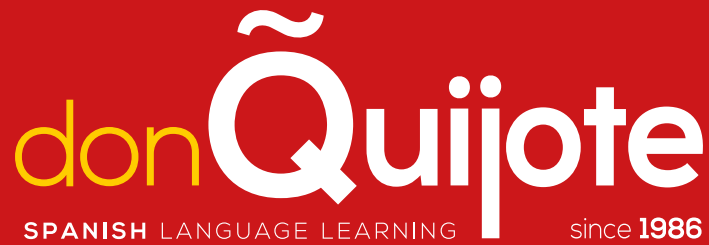

Enjoy and discover Mediterranean food!

Work as a team and enjoy the concept of positive energy, colorful, amazing, fun, summer, ADVENTURE.

You'll wish this Summer would never end!
